DETAILED ACTION

This office action is in response to applicant's amendment filed October 19, 2005.

Allowable Subject Matter

Claims 26-31,32,54,58 and 60-71 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious an insulating layer comprising a well and base, and a plurality of capacitors received within single well with the top most portion of the storage nodes proximate the outermost surface of the insulating layer including all the limitation of the independent claim.

In contrast, the prior art discloses a plurality of capacitors formed in a well formed by several insulating layers. Alternately the prior art shows a single electrode having multiple fins/pin structure in a single well.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments have been fully considered and are persuasive. The prior rejection is withdrawn.
